

2021 COMPASS NOW

NAVIGATING TOWARD STRONGER COMMUNITIES

How is your community faring?

Buffalo | Houston | La Crosse | Monroe | Trempealeau | Vernon

Acknowledgments

COMPASS Now 2021 would like to acknowledge and offer much gratitude to the following people and organizations for their time, commitment and expertise in the creation of this report.

Chair

Kayleigh Day, MPH, CHES – Monroe County Health Department

Coordination

Liz Evans – Great Rivers United Way

Consultation & Writing - Community Health Solutions

Stephen A. Horan, PhD, President

Theresa G. Laine, MS, Senior Consultant

Sherrina Gibson, Manager

Leah Horan, Project Support Staff

Design & Layout

Dan Howard – Gundersen St. Joseph's Hospital and Clinics

Steering Committee

Barb Barczak – Trempealeau County Health Department

Pauline Byom – Mayo Clinic Health System

Jessie Cunningham – Vernon Memorial Healthcare

Jacquie Cutts – La Crosse County Health Department

Kayleigh Day – Monroe County Health Department

Other Thanks

Thank you to the residents of Buffalo, La Crosse, Monroe, Trempealeau, and Vernon counties in Wisconsin and Houston County in Minnesota for completing the Random Household Survey in July and August of 2020 and the Convenience Survey in October and November of 2020; your responses laid the foundation of the assessment.

Additionally, thank you to all of the key informants who gave interviews for lending your thoughts and voices to an otherwise quantitative process during November and December of 2020.

Finally, thank you to everyone that was able to attend and participate in the county Stakeholder meetings. Your assistance in identifying and prioritizing the top needs of the region and counties involved in this process will help drive positive change throughout the region and assist many area residents. The following is a list of organizations that participated in the Stakeholder meetings in the region and is not inclusive of all of the representatives from the organizations that participated in this process:

List of Organizations that Participated in Community Stakeholder Meetings

AJ Falkers Counseling and Consulting Services	La Farge School District

Introduction

Compass Now is a joint effort of Great Rivers United Way, area healthcare organizations, and county health departments to improve the quality of life for everyone in the community. This introductory section outlines the purpose and additional elements of the study framework. Section 2 of the report provides detailed analysis of community indicators and insights gathered for this study.

Purpose of the Study

This report is the latest in a series of Compass Now needs assessments and reports published since 1995. In response to these reports, Great Rivers United Way has focused its funding system to more closely reflect identified community needs. In addition, a wide array of community organizations have used report findings to shape their own priorities and support grant requests.

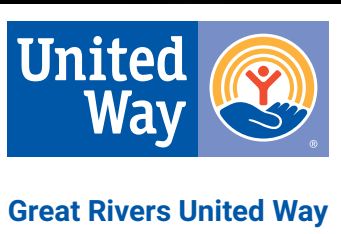

The purpose of this Compass Now 2021 report is to provide an updated assessment of community needs that can be used to inform community action strategies by stakeholders across the region. The Compass Now 2021 study is focused on communities within a six-county region including Buffalo, La Crosse, Monroe, Trempealeau, and Vernon counties in Wisconsin, and Houston County in Minnesota. This report describes needs within the six-county region. A set of supplemental reports providing more detailed insight about each county is available from the Great Rivers United Way website.

2020 Population Estimate

Buffalo	13,534
Houston	19,527
La Crosse	120,515
Monroe	46,889
Trempealeau	30,097
Vernon	31,029
Region	261,591

DONATE NOW

Adjusting to COVID-19

The Compass Now study described in this report was conducted during 2020, and consequently affected by disruptions caused by COVID-19. These disruptions required two primary adjustments to the study.

- One adjustment involved postponement of a planned set of community meetings. The original study plan envisioned a series of community meetings in 2020 to gather insight about needs and action ideas from local stakeholders. Because of social distancing requirements, the community meetings were postponed to 2021 and held on a virtual meeting platform.
- A second adjustment involved the process for surveying community members. The original study plan was to conduct a random household survey with community members across the region, supplemented by a 'convenience survey' and set of interviews with community members who might be under-represented in the random household survey. The convenience survey and interviews would have been conducted in community settings convenient to the prospective respondents. As a result of COVID-19 restrictions, the convenience surveys had to be conducted electronically, and the group interviews with community members could not be conducted in public spaces. As a result, we expect that some community members who would have participated in a face-to-face meeting were not able to participate in an electronic format.

Study Methods and Data Sources

The study was conducted under the direction of Great Rivers United Way, with technical support from a contracted consultant (Community Health Solutions). The study was guided by a *Compass Now Steering Committee* comprised of stakeholders from public health, health care, and other community sectors. The Steering Committee members provided guidance on the study scope and methods, including the adjustments made in response to COVID-19. The Steering Committee members also provided liaisons to engage community organizations in promoting participation in the convenience survey conducted for the study.

The study methods included analysis of community indicators from various sources, and community insights provided by respondents to a random household survey and a supplemental convenience survey. The study methods are summarized below, with more details provided in [Appendix A](#).

Community Demographics

A community demographic profile can provide insight about the size and distribution of the population in terms of health-sensitive attributes such as age, sex/gender, race, ethnicity, and income. Community demographics were analyzed and mapped using data and software from ESRI, a commercial provider of community data.

County Health Rankings

[The County Health Rankings & Roadmaps program](#) is a collaboration between the [Robert Wood Johnson Foundation](#) and the [University of Wisconsin Population Health Institute](#). The goals of the program are to:

- Build awareness of the multiple factors that influence health.
- Provide a reliable, sustainable source of local data and evidence to communities to help them identify opportunities to improve their health.
- Engage and activate local leaders from many sectors in creating sustainable community change.
- Connect and empower community leaders working to improve health.

As illustrated in *Exhibit 1.2*, the County Health Rankings are based on a model of community health that emphasizes the many factors that influence how long and how well we live. The Rankings use more than 30 measures that help communities understand how healthy their residents are today (health outcomes) and what will impact their health in the future (health factors).

Additional Community Indicators

Indicators from the County Health Rankings are supplemented with additional indicators from sources in the local region. These supplemental indicators include:

- Leading causes of death
- Maternal and infant health indicators
- Prevalence of mental health conditions and treatment gaps
- Asset-Limited, Income-Constrained, Employed (ALICE) households
- Child services cases.

The indicators are provided in several sections of the report, along with notes on specific data sources.

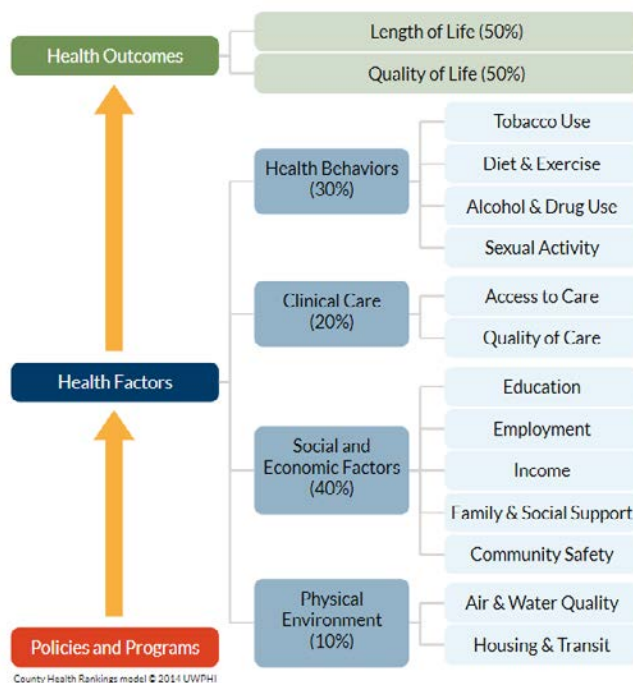

Exhibit 1.2 - The County Health Rankings Model

County Health Rankings. Retrieved in December 2020 from <http://www.countyhealthrankings.org>

Random Household Survey

A random household survey (RHS) of community residents was conducted in July-September of 2020. The survey was mailed to 6,000 randomly selected households using a sampling strategy designed to produce a target number of at least 100 survey responses from each of the six counties. In addition, within each county the mail-out was designed to over-sample from census tracts with relatively low income to help assure that lower-income community residents were represented. Great Rivers United Way staff and volunteers entered the survey data into a Qualtrics survey portal provided by Community Health Solutions.

Convenience Survey

A supplemental convenience survey (CS) was conducted in October-November 2020. The purpose of the CS was to generate additional survey responses from populations that may have been under-represented in the RHS. The CS was primarily conducted using mixed methods, and respondents could either complete their survey online or submit a paper copy of their survey response. Great Rivers United Way staff and volunteers entered paper survey responses into a Qualtrics survey portal provided by Community Health Solutions.

A profile of RHS and CS respondents is provided in *Exhibit 1.3*. As shown in the second column of the exhibit, a total of 713 RHS respondents returned their surveys, for a response rate of 12%. Focusing on responses by county, at least 91 surveys were returned for each jurisdiction. Compared to population estimates for the region as a whole, the RHS responses included a higher percentage of older adults than the population as a whole, and skewed toward respondents self-identifying as female and of White race. The household income profile for RHS respondents was fairly representative of the population as a whole, with slightly more representation at lower income levels. These differences between the RHS respondents and the overall population should be considered when evaluating the survey results presented throughout the report.

Exhibit 1.3 also provides a profile of CS respondents. A total of 510 CS responses were received, with more than half coming from La Crosse County. Compared to the RHS, the CS yielded higher representation of adults under age 45, women, minority populations, and middle-income households. The CS results are presented alongside the RHS results throughout the report to provide a multi-method profile of survey responses. The two surveys were not combined because they are based on two fundamentally different sampling strategies.

Exhibit 1.3 Profile of Community Survey Respondents

Indicator	Random Household Survey (RHS) Respondents	Convenience Survey (CS) Respondents	Regional Population Estimates
Total	713	510	204,400 (age 18+)
County			
Buffalo County	143	12	10,905
Houston County	97	53	15,512
La Crosse County	111	276	95,254

Other arrangement	3%	4%	--

Note: The age profile is for county residents age 18+. Profiles for sex or gender, race and ethnicity, household income, and housing type are for all age groups in the county. Source: CHS analysis of population estimates published by ESRI. [See Appendix A for details.](#)

Limitations of this Report

This Compass Now 2021 report is intended to inform community action strategies by stakeholders across the region. The data presented within the report comes from multiple sources, each with its own set of limitations that should be considered when interpreting the results.

Scope of Community Indicators

Section 2 of the report provides a series of exhibits showing various community indicators along with community insights from survey responses. The report was not designed to include every possible indicator of community health and well-being, partly because some of the data sources tapped for the 2018 Compass Now report are no longer available. The report does present a core set of community indicators that can be helpful for planning community improvement strategies. We encourage readers to use this report as a starting point, and go beyond the report to seek additional data and information that can help you plan and implement effective strategies for community improvement. Some data indicators contained in prior reports were not available, updated or deemed valid for this report.

County Health Rankings

The County Health Rankings are developed from multiple data sources with varying levels of reliability, and some of these data sources are several years old. Consequently, the rankings and indicators do not provide precise and definitive evidence on where one county stands compared to another. However, in most cases the rankings and indicators are reliable enough to illustrate general community strengths and areas of concern, and they can be helpful for informing efforts to improve community health and well-being.

Random Household Survey

The RHS was randomized by mailing address in an effort to give every household in the region an equal chance of receiving and completing the survey. The survey mailout to 6,000 households was stratified by county to assure that every jurisdiction would be represented. Within each county the survey was designed to over-sample from census tracts with relatively low income so that this population could be represented as well. As outlined in *Exhibit 1.3*, the RHS responses were significantly skewed toward older residents, and skewed to a lesser extent toward whites and lower income households. Consequently, we cannot say that the survey results are exactly representative of each county and the region as a whole. As a general guide, it is reasonable to assume the percent estimates in the regional RHS results are probably accurate within a margin of error of plus or minus 5%. At the county level, it is reasonable to assume the results are probably accurate within a margin of error of plus or minus 10%.

Convenience Survey

The purpose of the CS was to generate additional survey responses from populations that may have been under-represented in the RHS. The CS was primarily conducted using mixed methods, and respondents could either complete their survey online or submit a paper copy of their survey response.

Because the CS was not randomized across the region, it cannot meet the same standards of statistical significance as the RHS. In considering the CS results, it will be helpful to know the results are significantly skewed toward adults under age 45 and women, and skewed to a lesser extent toward minority populations and middle-income households. As noted earlier, the CS results are presented alongside the RHS results throughout the report to provide a multi-method profile of survey responses. The two surveys were not combined because they are based on two fundamentally different sampling strategies.

Respondent Perceptions.

Both the RHS and CS asked respondents to share their insights about a wide range of factors at the individual, household, and community level. Many of the survey questions rely on respondent perceptions of community concerns and community supports. Perceptions are subjective and based on the unique experience of each individual respondent. A respondent's perception of a community issue reflects their reality, but might not reflect the actual situation in the community.

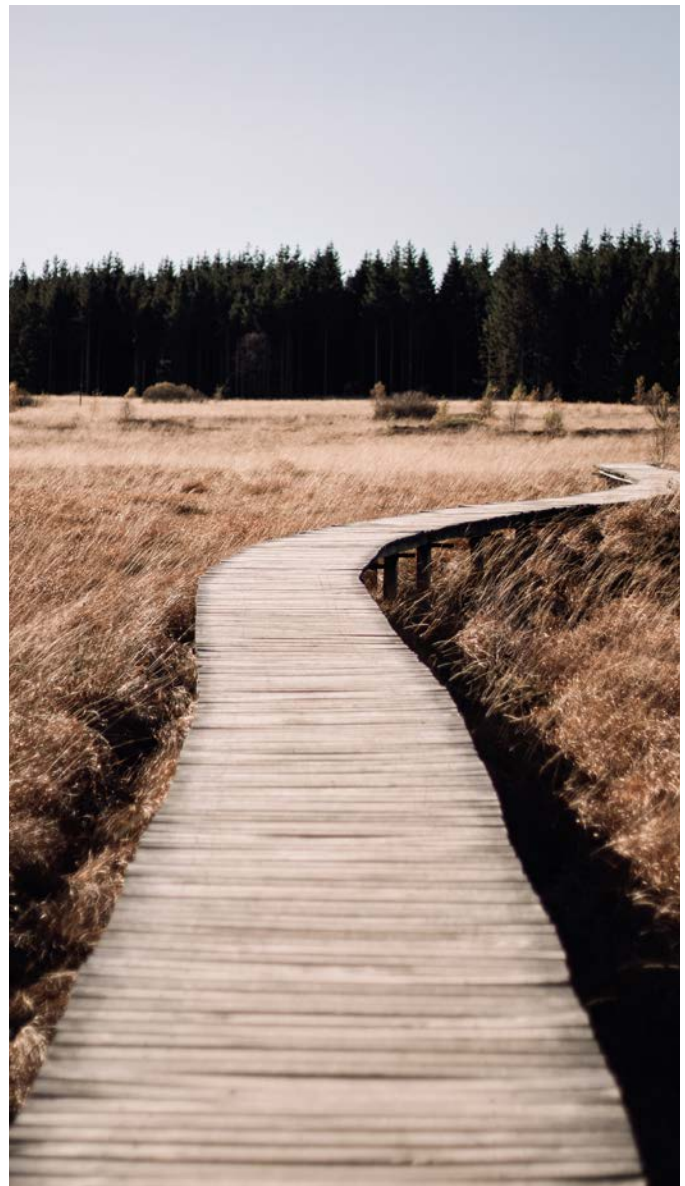

Bridging the Compass Now 2018 and 2021 Reports

The Compass Now 2021 study and report were framed and designed to provide continuity with the 2018 Compass Now Report where it was feasible and advisable to do so. For example, the main topics in Section 2 (Length and Quality of Life, Health Behaviors, etc.) reflect the main topics in the 2018 Compass Now report with a few minor exceptions. The designs for the 2020 RHS and CS were also crafted to reflect the 2018 approach, with some adjustments for sampling and refinement of survey questions. And like the 2018 report, Compass Now 2021 relies heavily on the County Health Rankings from the University of Wisconsin-Madison Population Health Institute. However, some of the community data sources used in 2018 were not available in a usable format for the 2021 report.

Although there is general continuity of structure between the 2018 and 2021 reports, caution should be used when comparing the results. One consideration is most of the community indicators in the 2021 report are several years old, and the same was true for the 2018 report. This problem of 'data lag' is a challenge not only for the Compass Now study series, but also for every community needs assessment that relies on secondary sources of data. Consequently, it is not possible to measure improvement on community indicators from 2018 to 2021 in a relevant and reliable way.

Another methodological consideration is the degree of comparability between the random household survey results from the 2018 and 2021 reports. One consideration is the 2018 and 2021 survey results were generated by two different survey populations that likely had some overlap but cannot be reliably compared. A second consideration is that much has changed in the community environment since 2018, including but not limited to the effects of the pandemic. As general guidance, it is best to view the survey results from 2018 and 2021 as two snapshots of different populations within the same communities.

As a final consideration, this report is not intended as a scorecard on the relative health and well-being of one county compared to another. Throughout the report we provide county-level indicators on a number of community issues. However, these indicators are not structured to support reliable comparisons between counties. To illustrate this point, although the County Health Rankings do provide a relative ordering of counties on various indicators, in many cases the differences in ranking are not based on statistically significant differences in the underlying data used to generate the rankings. Beyond statistics, each county has its own unique set of factors that influence the health and well-being of the population. We recommend focusing on how to sustain strengths and address challenges within each county rather than comparing counties in scorecard fashion.

How is the Great Rivers Region Faring?

This section summarizes data on how the Great Rivers region is faring today. The data include community health indicators from various sources, and community insights from the random household survey (RHS) and the convenience survey (CS).

The Six-County Region

The six-county region is diverse in terms of population size, selected demographic indicators, and overall health rankings. This section provides a demographic overview of the region and a summary of County Health Rankings for the region.

Demographic Profile

As shown in *Exhibit 2.1*, the six-county region is home to an estimated 261,591 residents. Within the population an estimated 25% are children age 0-17, and an estimated 20% are adults age 65+. About 8% of the population is classified as minority, and about 18% of households have annual income below \$25,000.

Exhibit 2.2 provides a closer look at the population by age. Within the population there are an estimated 55,999 children age 0-17, and 48,374 adults age 65+. Looking ahead to 2025, overall population growth for the counties is projected to range from -1% to +2%. Within all counties, the most substantial growth is projected for the older-adult population.

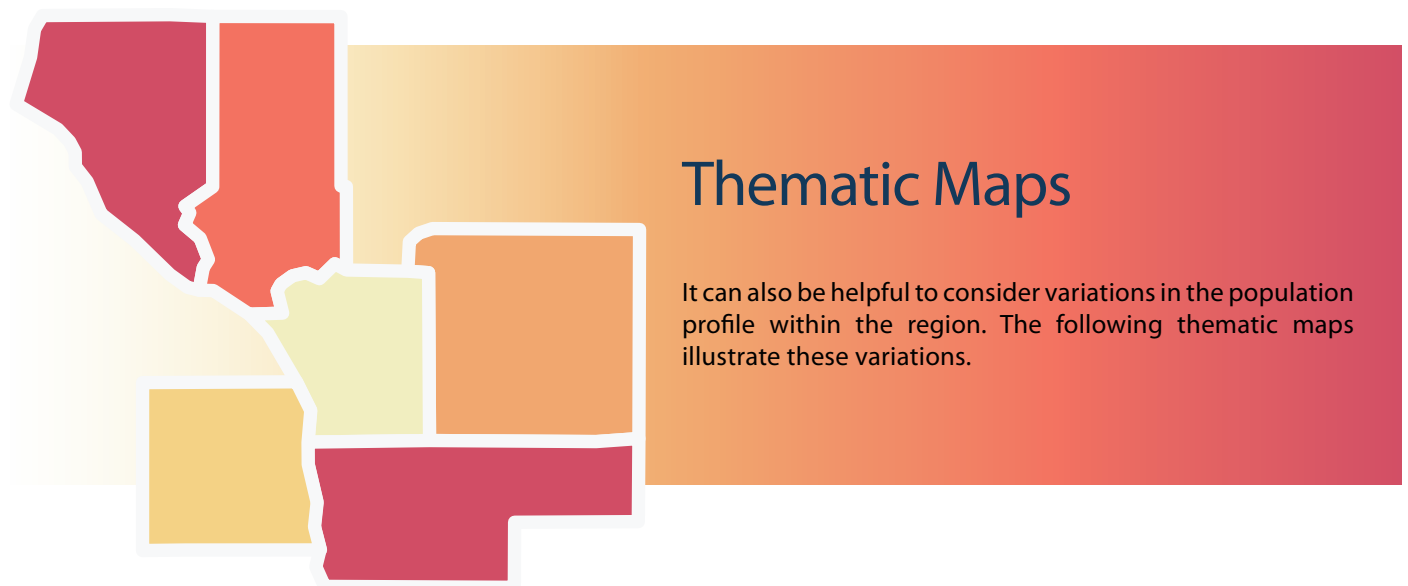

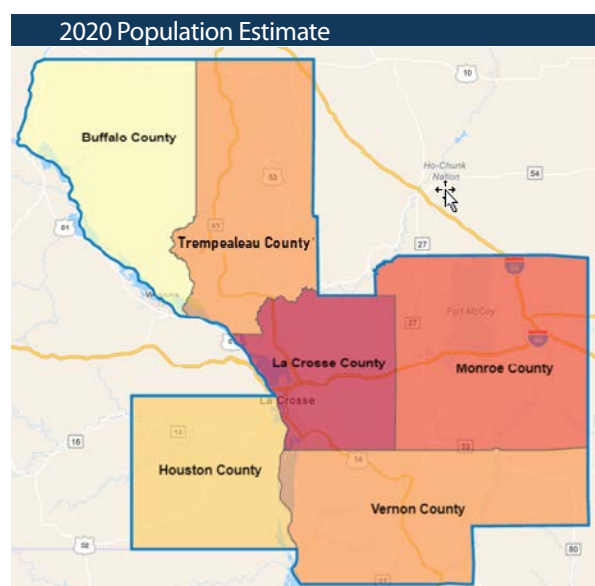

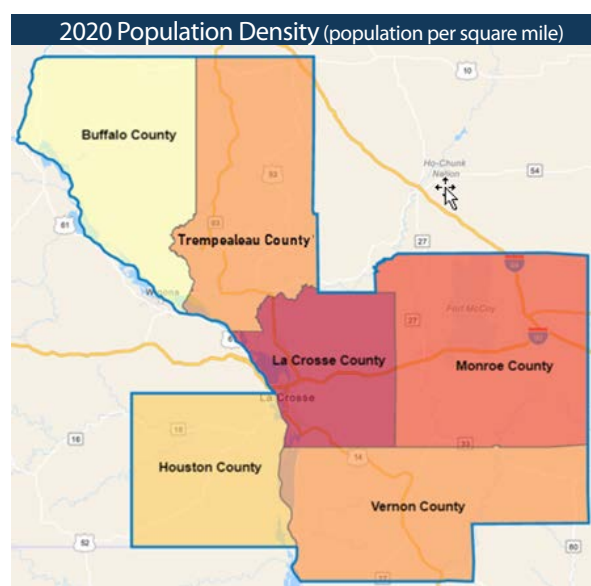

Exhibit 2.3 Total Population by County

Population by County. Exhibit 2.3 shows how the six counties vary in estimated population size from a high of 120,515 in La Crosse County, to a low of 13,534 in Buffalo County.

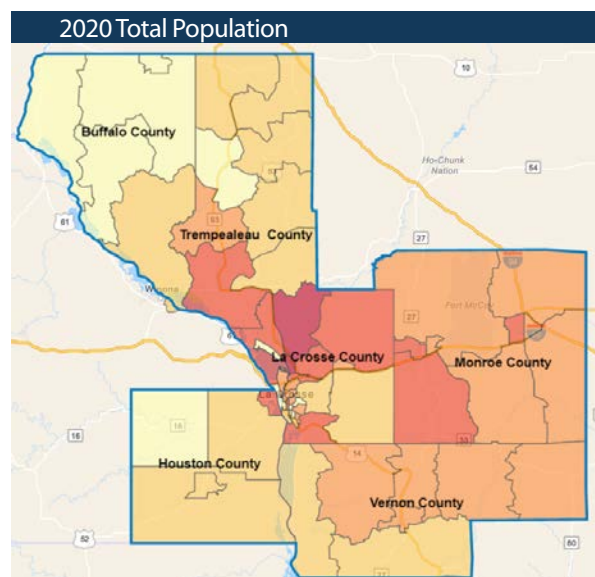

Buffalo	13,534
Houston	19,527
La Crosse	120,515
Monroe	46,889
Trempealeau	30,097
Vernon	31,029
Region	261,591

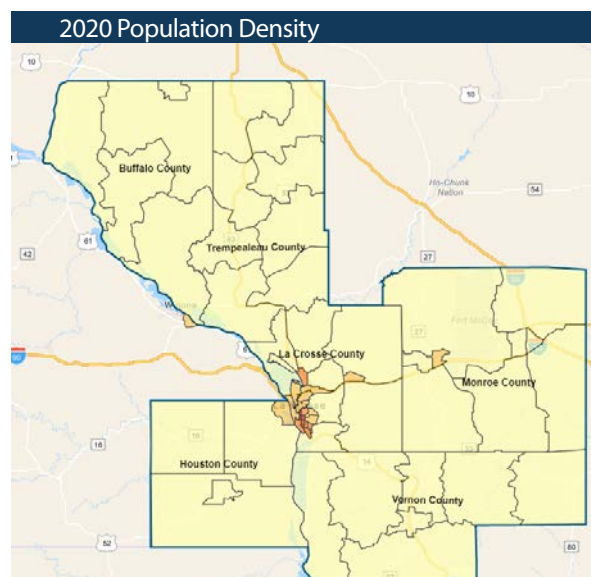

20.2 - 27.7	46.6 - 159.4
27.8 - 37.2	159.5 - 266.8
37.3 - 46.5	

Exhibit 2.4 Total Population by Census Tract

Population by Census Tract. Exhibit 2.4 provides a closer look at the estimated population by census tract, with most of the larger census tracts located in the central part of the region.

1,982 - 3,065	5,385 - 8,728
3,066 - 4,181	8,729 - 10,598
4,182 - 5,384	

12.1 - 754.6	5,486.5 - 7,711.6
754.7 - 2,662.4	7,711.7 - 8,591.1
2,662.5 - 5,486.4	

Source: CHS analysis of population estimates published by ESRI. See [Appendix A](#) for details.

Exhibit 2.5 Child Population by Census Tract

Child Population. *Exhibit 2.5* shows the estimated distribution of the child population, with higher numbers of children in census tracts located in the central and eastern part of the region.

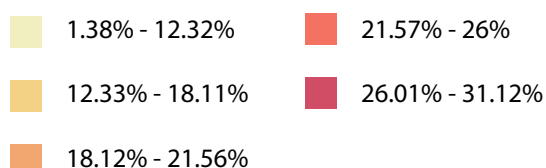

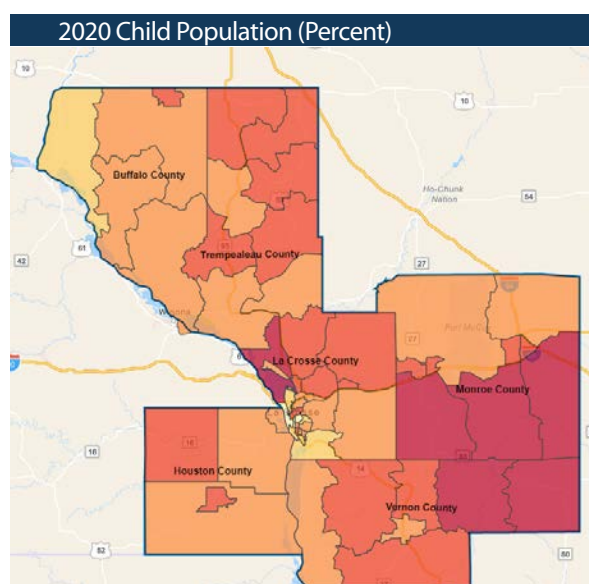

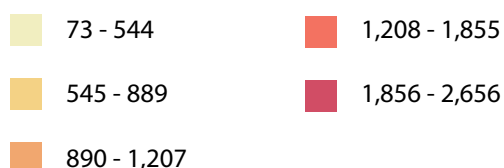

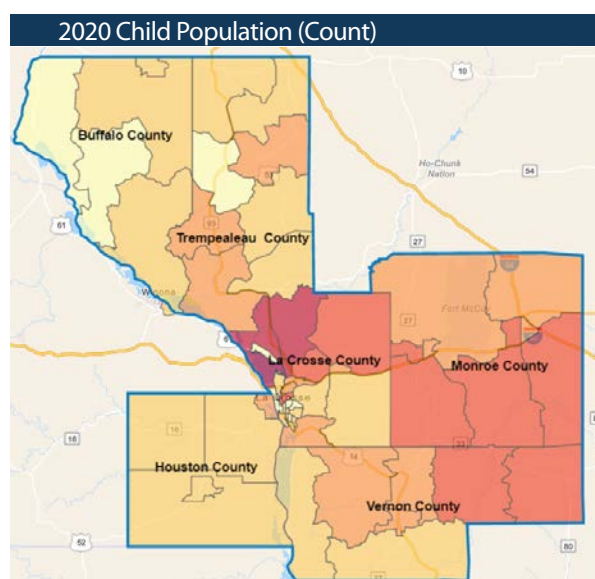

Exhibit 2.6 Older Adult Population by Census Tract

Older Adult Population. *Exhibit 2.6* shows the estimated distribution of the older adult population, with higher numbers in La Crosse County and selected census tracts in Monroe County and Vernon County.

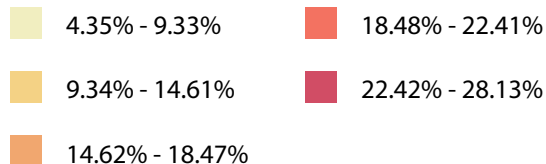

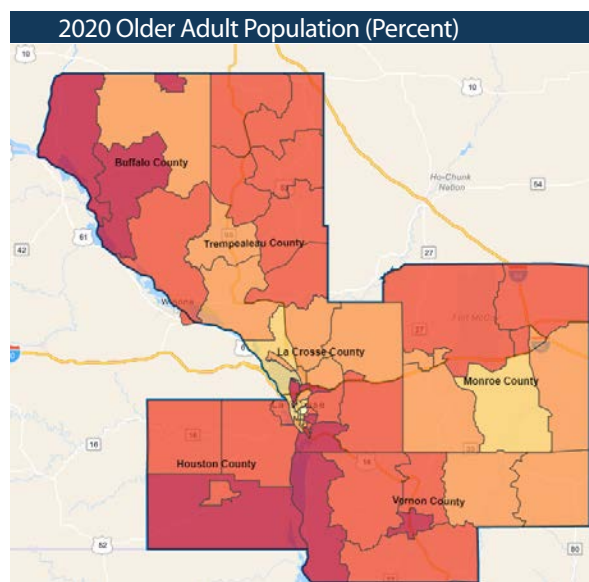

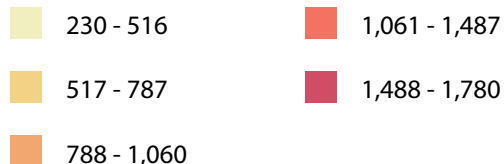

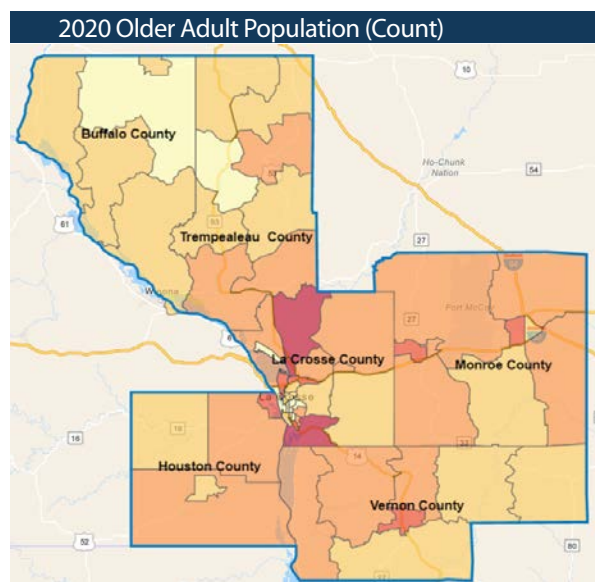

Exhibit 2.7 Minority Population by Census Tract

Minority Population. Exhibit 2.7 shows the estimated distribution of the minority population, with higher numbers within census tracts located in Trempealeau County, La Crosse County, and Monroe County.

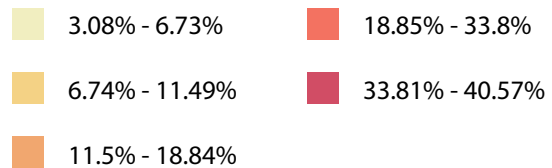

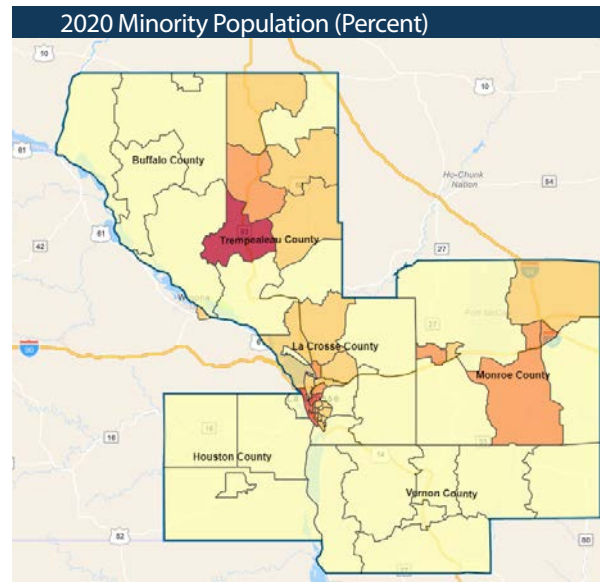

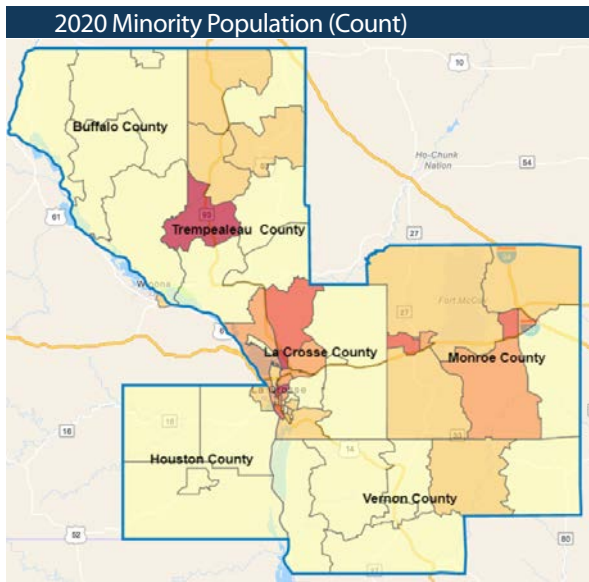

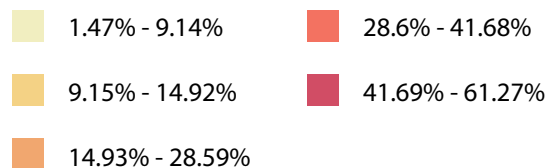

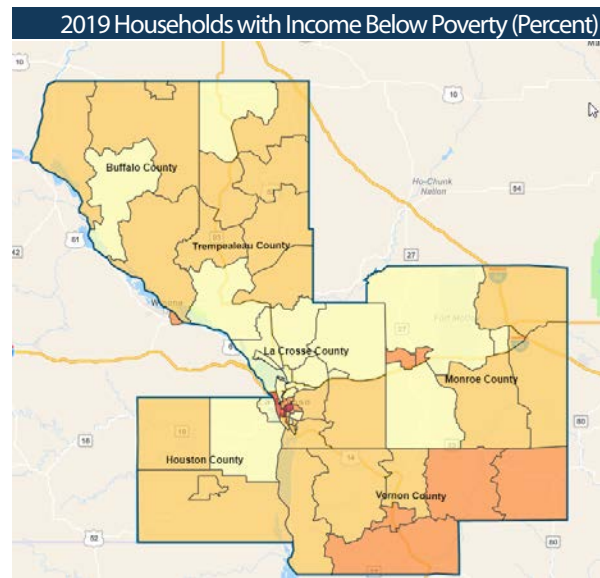

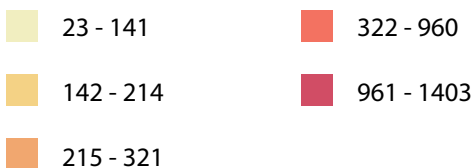

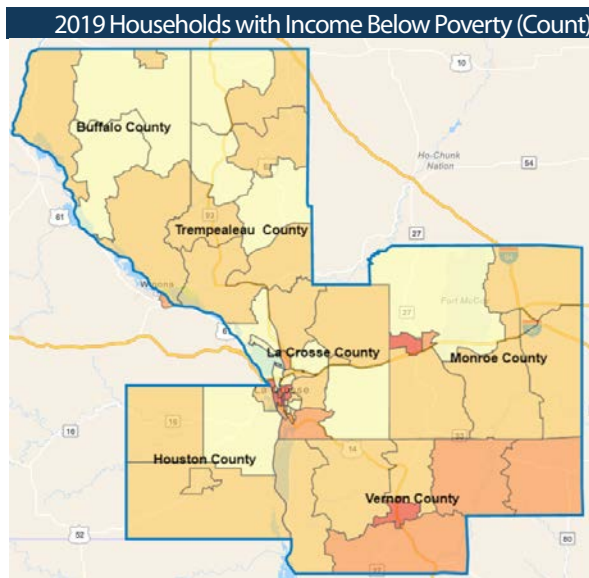

Exhibit 2.8 Households with Income below Poverty by Census Tract

Low-Income Households. Exhibit 2.8 shows the estimated distribution of households within poverty, with higher numbers within census tracts located in La Crosse County, Monroe County, and Vernon County.

Source: CHS analysis of population estimates published by ESRI. See [Appendix A](#) for details.

Summary of County Health Rankings

Exhibit 2.9 provides a profile of the [County Health Rankings](#) for the six-county region. Within the exhibit, Houston County is ranked against other counties in Minnesota, and the Wisconsin counties are ranked among all 72 counties in the state. The top half of the exhibit shows where each county ranks on the indicators shown. Green shading indicates a ranking in the 1st (best) quartile, with blue, gold, and red shading indicating the 2nd, 3rd, and 4th quartile. The bottom part of the exhibit shows trends for the six counties. The rankings and trends are explored in more detail in the following pages.

Exhibit 2.9 County Health Rankings Summary for 2020

Length and Quality of Life

Measures of **length of life** in a community indicate whether people are dying too early and prompts exploration to look at what's driving premature deaths. Measures of **quality of life** indicate how people feel about their health and well-being at a given point in time. This section describes selected community indicators and community insights about length and quality of life.

Community Indicators

Community indicators presented below include County Health Rankings, leading causes of death, and maternal and infant health indicators.

County Health Rankings. Exhibit 2.10 shows the County Health Rankings for length and quality of life. As shown, Monroe County and Trempealeau County rank in the third or fourth quartile on the length of life measure, and La Crosse, Monroe, and Trempealeau rank in the third quartile for quality of life. The length and quality of life rankings are based on the indicators shown in the exhibit. Five of the six counties are improving on their premature death trend.

Leading Causes of Death. To further explore **mortality** in the region, *Exhibit 2.11* shows the leading causes of death as of 2018. As shown, diseases of the heart and malignant neoplasms were the leading causes of death in the six counties and the state of Wisconsin. Other leading causes were chronic lower respiratory diseases, accidents (unintentional injuries), cerebrovascular diseases, and Alzheimer's Disease.

Exhibit 2.11 2018 Leading Causes of Death

	BU	HO	LC	MO	TR	VE	REGION	MN	WI
Counts-Total Deaths by All Causes

Maternal and Infant Health. Maternal and infant health measures can also provide insight about community quality of life. As shown in *Exhibit 2.12*, there were 2,932 births in the region in 2018. Of these, 178 (6%) were low-weight births, compared to 8% for Wisconsin as a whole. There were sixteen infant deaths in the region during 2018, with higher rates in Monroe and Trempealeau. It is important to note that infant deaths can fluctuate significantly, and one year of data is insufficient to support definitive conclusions about infant mortality rates.

Community Insights

Community survey respondents were invited to rate various aspects of community life. These ratings can provide insights about the quality of community life in its various dimensions.

Ratings of Community Life. Exhibit 2.13 shows ratings of selected aspects of community life on a scale from poor to excellent. The most positive ratings (good or excellent) were provided for the community as an overall place to live, and for opportunities to volunteer in the community. (As additional context, 53% of RHS respondents and 62% of CS respondents reported they or a family member volunteer.). The most negative ratings (poor or fair) were for the community as a place that meets family recreational needs, opportunities for youth, a place where all people are treated respectfully, and a place where people of different cultural/racial/ethnic backgrounds are included in decision making.

Exhibit 2.13 Ratings of Community Life

Topic/Survey	Poor	Fair	Good	Excellent	No Opinion	Total
a. Rating of your community as a place to live						
RHS	1%	11%	55%	33%	N/A	710
CS	1%	17%	58%	25%	N/A	510
b. Your community as a place that meets your family's recreational needs (Fine arts, outdoor activities, etc.)						
RHS	7%	28%	45%	16%	5%	695
CS	8%	27%	40%	23%	1%	508
c. Opportunities for youth to explore interests and participate in positive activities.						
RHS	9%	30%	40%	11%	10%	698
CS	14%	26%	36%	16%	8%	508
d. Opportunities to volunteer in your community.						
RHS	5%	20%	48%	21%	6%	696
CS	5%	22%	43%	25%	4%	508
e. Your community as a place where all people are treated respectfully, regardless of their race, culture, religion, gender, sexual orientation, income level, disability, or age.						
RHS	10%	28%	45%	13%	4%	700
CS	25%	39%	25%	9%	1%	507
f. Your community as a place where people of different cultural/racial/ethnic backgrounds are included in decision-making.						
RHS	15%	30%	33%	8%	14%	697
CS	36%	34%	20%	6%	5%	507

We have lots of trails and lots of open space and people can play outside. But again, I think it depends on your family, it depends on your ability to drive, or whatever, but I think just as far as not living in the city and being able to go outside anytime and just play outside is a great advantage.

-Interpreter for Hispanic Farm Workers

Ratings of Educational Opportunities. *Exhibit 2.14* provides a closer view of ratings of educational opportunities. The most positive ratings (good or excellent) were for the community as a place that meets the family's educational needs, availability of early education opportunities, and the quality of K-12 education. The most negative ratings (poor or fair) were for opportunities to obtain additional knowledge or skills, and the availability of community resources to learn new skills.

Exhibit 2.14 Ratings of Educational Opportunities

Topic/Survey	Poor	Fair	Good	Excellent	No Opinion	Total
a. Your community as a place that meets your family's educational needs						
RHS	2%	13%	46%	23%	15%	700
CS	3%	17%	45%	30%	6%	508
b. The availability of early education opportunities in your community (e.g., play groups, Head Start, 4 year old kindergarten)						
RHS	3%	11%	40%	24%	22%	700
CS	4%	17%	38%	24%	17%	508
c. The quality of education grades K -12 in your community						
RHS	2%	11%	46%	26%	15%	696
CS	4%	12%	44%	30%	10%	507
d. Opportunities to gain additional knowledge or skills (tuition reimbursement, conferences, skills training courses, classes)						
RHS	9%	23%	35%	12%	21%	697
CS	15%	33%	32%	11%	9%	506
e. The availability of community resources to learn new skills or hobbies (e.g., woodworking, photography, computers)						
RHS	17%	28%	31%	10%	14%	698
CS	22%	34%	31%	8%	5%	506

Concerns about Community Life. *Exhibit 2.15* shows ratings of concern about selected issues related to community life. The ratings were mixed, but substantial numbers of respondents expressed concern about racism, school bullying, cyber bullying, and discrimination.

Exhibit 2.15 Concerns about Issues Related to Community Life

Topic/Survey	Not Concerned	A Little Concerned	Moderately Concerned	Very Concerned	No Opinion	Total
a. Racism						
RHS	27%	29%	24%	16%	3%	700
CS	11%	19%	28%	40%	1%	506
b. School bullying						
RHS	8%	20%	33%	32%	8%	699
CS	3%	17%	40%	35%	5%	506
c. Cyber bullying						
RHS	11%	20%	30%	29%	11%	699
CS	4%	23%	37%	31%	5%	505
d. Discrimination						
RHS	21%	26%	28%	19%	6%	699
CS	9%	24%	28%	38%	1%	506

Health Behaviors and Concerns

Health behaviors are actions individuals take that affect their health, such as eating well, being physically active, avoiding smoking, excessive alcohol intake, and risky sexual behavior. This section describes community indicators and community insights about health behaviors and related concerns.

Community Insights

Community survey respondents were asked to rate their personal health and identify concerns about health issues in the community.

Ratings of Personal Health. Exhibit 2.17 shows that among RHS respondents, 22% rated their personal health as fair or poor, 12% rated their overall mental health as fair or poor, and 21% rated their overall dental health as fair or poor. CS respondents had a notably higher percentage of fair or poor rating for mental health.

Mental health is a big, big concern for me when it comes to my veterans as well as homelessness, substance abuse, is a pretty big thing when it comes to self-medicating because they don't want to talk to somebody about it because they don't want to appear weak.

-Veterans Services Officer

Concerns about Health Issues. Survey respondents were asked to rate their level of concern about selected health issues in the community. As shown in *Exhibit 2.18*, the majority of survey respondents indicated they were moderately or very concerned about mental health, alcohol use, obesity, prescription drug misuse, suicide, tobacco use, e-cigarettes & vaping, and illegal drug use.

Community Indicators

Community indicators presented below include County Health Rankings, cancer screening rates, and indicators of mental health needs.

County Health Rankings. Exhibit 2.19 shows the County Health Rankings for clinical care. As shown, Houston, La Crosse, and Monroe, rank in the 1st or 2nd quartile. Buffalo, Trempealeau, and Vernon rank in the 3rd or 4th quartile. Trends indicate that all of the counties are improving on multiple indicators of clinical care.

Very limited access to dental services for those on badger care. Most providers do not accept this level of coverage. Those that do have long waiting lists and/or are far away.

- CS Respondent

Cancer Screening Rates. *Exhibit 2.20* shows selected cancer screening rates for each county within the region. The colorectal cancer screening rate was lower than Wisconsin as a whole.

Screening rate definitions follow:

- **Breast Cancer:** The percentage of women aged 50-74, who receive primary care from a Wisconsin Collaborative for Healthcare Quality (WCHQ) member health system and had a minimum of one breast cancer screening test during the two-year measurement period.
- **Cervical Cancer Measure:** The percentage of adults aged 21-29 who had a minimum of one cervical cancer screening (cytology) test during the 3-year measurement period; and aged 30-64 who had a minimum of one cytology test during the 2-year measurement period or one screening cytology test and an HPV test within the last 5 years.
- **Colorectal Cancer Measure:** The percentage of adults aged 50-75, who receive primary care from a WCHQ member health system and received a screening for colorectal cancer. This could include a colonoscopy in the past ten years, a CT colonography or flexible sigmoidoscopy in the past five years, or a stool test within the last year.

Mental Health Care. Selected mental health indicators are shown in *Exhibit 2.21*. Focusing on estimates for adults, more than 34,000 individuals experienced a mental illness in 2017. Of these, more than 15,000 received mental health services, while more than 19,500 (56%) did not receive services. Among youth, more than 8,400 experienced a mental illness in 2017. Of these, nearly 5,000 received treatment, but more than 3,400 (41%) did not receive services.

Community Insights

Self-Reported Health Coverage. Survey respondents were asked to provide information on health coverage for their household. As shown in *Exhibit 2.22*, more than 90% of survey respondents reported all members of their household have health coverage. Among RHS respondents, the leading types of health coverage were Medicare, employer based insurance, and private insurance. Among CS respondents, the majority reported employer-based insurance, followed by Medicaid, Medicare, and private insurance.

Exhibit 2.22 Self-Reported Health Coverage

Do all members of your household have health coverage?			
Topic/Survey	Yes, all members have health coverage	No, one or more members do not have health coverage	Total
RHS	96%	4%	697
CS	92%	8%	504

Do any members of your household have the following types of health insurance? (check all that apply)		
Type	RHS	CS
Medicaid (Badger Care/Medical Assistance)	8%	15%
Medicare	37%	14%
Private Insurance	23%	14%
Employer Based Insurance	27%	53%
Other	5%	3%
Not Applicable-No one in my household has health insurance	2%	1%

Ratings of Health Care Access and Affordability. Survey respondents were asked to rate their ability to access and afford health services including healthcare, mental health care, and dental care. As shown in *Exhibit 2.23*, the large majority rated their access and ability to afford services as good to excellent. However, sizable percentages reported poor or fair ratings for access and affordability. Focusing on the RHS results, the percent of respondents reporting poor or fair ability to pay for services was 25% for healthcare, 33% for mental health care, and 28% for dental care. For CS respondents the percent reporting poor or fair ability to pay for services was 37% for healthcare, 45% for mental health care, and 37% for dental care.

Exhibit 2.23 Ratings of Health Care Access and Affordability

Health Care Sources and Obstacles for Adults. Survey respondents were asked to identify their usual source of health care and any obstacles to receiving health care. As shown in *Exhibit 2.24*, the most commonly cited sources of care were clinics, doctor's offices, and urgent care centers. The most common obstacles to receiving services were scheduling and affordability.

Exhibit 2.24 Health Care Sources and Obstacles for Adults

Usual Source of Health Care for Adults

Provider Source	RHS	CS
Clinic	36%	29%
Doctor's Office	26%	25%
Urgent Care	17%	17%
Hospital Emergency Room	10%	7%
Internet	3%	8%
Express Care in a grocery or drug store	2%	7%
I do not have a place that I go most often	2%	2%
VA Medical Center	2%	1%
Free Clinic	1%	3%
VA Outpatient Clinic	1%	1%

Obstacles to Health Care for Adults

In the last 12 months, was there any time when you needed to see a doctor or other health care provider but did not because of any of the following reasons? (check all that apply)	RHS	CS
Could not schedule the appointment at a convenient time	9%	20%
Could not afford the cost	7%	17%
Did not have insurance	2%	5%
Did not have transportation	2%	2%
There was a language barrier	0%	0%
Could not get childcare	0%	4%
None of the above	80%	52%

Dental Visits and Obstacles for Adults. Survey respondents were asked to identify their most recent dental appointment and any obstacles to dental care. As shown in *Exhibit 2.25*, a large majority of respondents said they had a dental visit within the past year, and about 18% said it has been 2 years or longer since they had a dental visit. The most commonly reported obstacles to dental care were affordability and scheduling.

Exhibit 2.25 Dental Visits and Obstacles for Adults

Most Recent Dental Visit for Adults

How long has it been since you have seen a dentist for any reason?	RHS	CS
Within the past year	73%	69%
Within the past 2 years	9%	14%
Within the past 5 years	7%	6%
5 or more years	6%	10%
Don't know	5%	2%
Total	700	505

Obstacles to Dental Care for Adults

In the last 12 months, was there any time when you needed to see a dentist but did not because of any of the following reasons? (check all that apply)	RHS	CS
Could not afford the cost	11%	15%
Did not have insurance	8%	7%
Could not schedule the appointment at a convenient time	5%	11%
Did not have transportation	1%	2%
There was a language barrier	0%	0%
I could not get childcare	0%	3%
None of the above apply to me	75%	63%

Although I have insurance (health and dental) the deductible costs are prohibitive and often end up in collections as the minimal monthly payments are not affordable.

- CS Respondent

Health Care and Dental Visits for Children. Survey respondents with children in the home were asked to identify a usual source of health care, along with time since the dental visit. As shown in *Exhibit 2.26*, the most commonly reported sources of health care were doctor's offices, clinics, and urgent care. The large majority reported their children had a dental visit within the past year, with less than 10% reporting two or more years since the last dental visit.

Exhibit 2.26 Health Care and Dental Visits for Children

Usual Source of Health Care for Children

Provider Source	RHS	CS
Clinic	33%	30%
Doctor's Office	32%	32%

Within the past 5 years	2%	5%
5 or more years	2%	2%
Don't know	7%	6%
Total	123	259

”

One of the biggest things we see is just being able to afford healthcare and it's been a real struggle for transportation so just getting to a healthcare facility I think our providers tend to when they're in an appointment with individuals they actually learn more of some of the disparities that they're facing. A lot of times we see them with food disparities, housing disparity issues and things like that but I know historically we have seen in all of our clinic sites in the rural areas was the ability to actually get to a clinic to receive services

-Healthcare Provider

Social and Economic Factors

Social and economic factors, such as income, education, employment, and social supports can significantly affect community health and quality of life. This section describes selected community indicators and community insights related to social and economic factors.

Community Indicators

Community indicators presented below include County Health Rankings, low-income households, and child services cases.

County Health Rankings. Exhibit 2.27 shows the County Health Rankings for social and economic factors. As shown, all of the six counties are ranked in the 1st or 2nd quartile within their states. Focusing on selected trends, an increase in the child poverty rate is indicated for Buffalo, Monroe, Trempealeau, and Vernon. In considering these indicators it is important to note the social and economic indicators shown do not reflect the disruptions caused by COVID-19 in 2020.

my landlord is selling the house I'm renting and its really hard to find a new place that's affordable. I was able to recently find a new daycare for my youngest son, but if that closes I don't know what I would do.

- CS Respondent

Low-Income Households. Household income is a fundamental indicator of health opportunity. As shown in *Exhibit 2.28*, in 2018 there were an estimated 11,420 households in the region with income at or below poverty. Another important indicator is the number of ALICE households. ALICE® is an acronym for Asset Limited, Income Constrained, Employed, and provides a new way of defining and understanding the struggles of households that earn above the Federal Poverty Level, but not enough to afford basic necessities. In 2018 there were an estimated 24,778 households in the region that could be classified as meeting the ALICE criteria.

Community Insights

Caring for Vulnerable Persons. Survey respondents were asked if they care for individuals who are aging or have a disability, and to share their insights about community supports for these vulnerable populations. As shown in *Exhibit 2.30*, 18% of RHS respondents reported they care for an individual that is aging, and 12% reported they help care for an individual with a disability. For CS respondents, 20% help care for an individual that is aging, and 20% help care for an individual with a disability.

Exhibit 2.30 Caring for Vulnerable Persons

Do you currently help care for an individual that is aging?

Survey	Yes	No	Total
RHS	18%	82%	696
CS	20%	80%	505

Do you currently help care for an individual that has a disability?

Survey	Yes	No	Total
RHS	12%	88%	691
CS	20%	80%	504

Concerns about Vulnerable Persons. As shown in *Exhibit 2.31*, well over 50% of survey respondents said they are moderately or very concerned about factors affecting vulnerable persons in the community, including child abuse, domestic abuse, elder abuse, and sexual abuse or violence.

Exhibit 2.31 Concerns about Vulnerable Persons in the Community

I lost my job and insurance because of COVID and my family is really struggling to pay our bills.

- CS Respondent

Concerns about Meeting Household Needs. Survey respondents were asked to rate their concerns about meeting household needs related to food, housing, clothing, taxes, utilities, childcare, and legal assistance. As shown in *Exhibit 2.33*, the large majority of respondents reported no concern or little concern about meeting basic household needs. Focusing on RHS respondents, the percentage reporting being moderately or very concerned ranged from about 9% to 20% across the factors listed. The percent of CS respondents who are moderately or very concerned ranged higher, from about 15% to 40% across the factors listed. The highest level of concern among CS respondents was ability to pay for education beyond high school.

Concerns about Access to Healthy Food. Survey respondents were asked to describe their access to healthy food. As shown in *Exhibit 2.34*, the large majority rated their access and ability to pay for healthy food as good or excellent. Focusing on ability to pay for food, 17% of RHS respondents and 27% of CS respondents rated their ability to pay for healthy food as poor or fair. Also, 14% of RHS respondents and 22% of CS respondents reported running out of money to get more food either sometimes, occasionally, or often.

Physical Environment and Safety

Physical environment and community safety affect length and quality of life. The physical environment includes the spaces where individuals live, learn, work, and play. People interact with their physical environment through the air they breathe, water they drink, houses they live in, and the transportation they access to travel to work and school. This section describes selected community indicators and community insights about the physical environment and safety in the region.

Community Indicators

County Health Rankings. *Exhibit 2.37* shows the County Health Rankings for the physical environment. As shown, Buffalo and La Crosse rank in the 1st and 2nd quartile. Houston, Monroe, Trempealeau, and Vernon rank in the 3rd or 4th quartile. Focusing on selected trends, all six counties are getting better on the air pollution measure.

Community Insights

Survey respondents were asked to share their insights about various aspects of the physical environment and safety within their communities.

Rating of Overall Community Safety. As shown in *Exhibit 2.38*, the large majority of survey respondents rated overall community safety as good or excellent. 10% of RHS respondents and 20% of CS respondents rated overall community safety as poor or fair.

Exhibit 2.38 Rating of Overall Community Safety

Rating of Overall Community Safety					
Survey	Poor	Fair	Good	Excellent	Total
RHS	0%	10%	66%	23%	699
CS	1%	19%	65%	15%	507

Concerns about Community Safety. Survey respondents were asked to rate their level of concern about a list of community safety issues. As shown in *Exhibit 2.39*, 49% or more of survey respondents said they were moderately or very concerned about school safety, cyber security, criminal activity, and disease outbreak.

Exhibit 2.39 Concerns about Community Safety

I am happy to live in this rural, small-town community with access to excellent healthcare & other amenities in nearby larger community of La Crosse

- RHS Respondent

Community Insight on Priority Needs and Ideas for Solutions

Sections 1 and 2 of this report provide a comprehensive analysis of community needs based on community indicators and community survey responses. This section provides supplemental insight based on a meeting with community stakeholders and a follow-up survey on priority needs for each county.

Meeting with Community Stakeholders (Regional Overview)

Great Rivers United Way collaborated with local partners to organize a series of virtual meetings with community stakeholders from each of the six counties in the study region. The purpose of the meetings was to gather additional insight about priority needs and action ideas from a local perspective.

The invited participants included representatives from local businesses, education, faith, government, health and human services, and nonprofit agencies. A total of 191 individuals participated in the various county meetings. The meetings were facilitated virtually so that participants could attend while maintaining social distancing for the pandemic. Prior to the meetings, each participant was provided with a draft copy of the Introduction and Sections 1 and 2 of this report.

- During the meetings, participants were invited to share their insights about pressing community needs as viewed from their perspective.
- The meeting participants were also invited to complete a post-meeting survey to prioritize among the areas of need identified at the meeting event.

The results of the meetings and follow-up survey are summarized below. In reviewing the results, please note they are only a starting point for identifying priority needs and creative solutions. In the coming months, community stakeholders from each county can continue to identify needs and develop solutions based on additional insights from community members.

Priority Needs Identified by Community Stakeholders (Regional Overview)

Exhibit 3.1 provides a regional summary of the top five priority needs identified by Community Stakeholders from the six counties. The first column shows pressing areas of need identified by the participants during the meeting event. The second column shows the priority rankings of need based on results from a follow-up survey of meeting participants.

Exhibit 3.1 Top Five Priority Needs Identified by Community Stakeholders

	BU	HO	LC	MO	TR	VE
Areas of Need Identified in the Community Stakeholder Meeting	Priority Ranking Based on Post-Meeting Survey Results

Transportation	*	*	*	*	*	5
Healthcare Access	5	4	*	5	*	*
Emergency Room Response - Volunteer Fire and EMS	3	*	*	*	*	*

*This item was not ranked in the top five needs for this county. However, it may be included in a lower ranking. Please refer to the county level summary and report for additional details. Source: The 191 participants in the community stakeholder meeting were invited to prioritize the areas of need identified during the meeting via a post-meeting survey. Eighty-one participants responded. Items are ranked based on the mean priority score for each area of need.

As shown in *Exhibit 3.1*, the list includes needs related to mental health, access to health care, social and economic factors, quality of life, and physical environment and safety. These issues are reflected in the community indicators and survey results presented in [Section 2](#) of the report. We encourage community stakeholders to review [Section 2](#) for additional insight and context on the issues.

County-level tables are provided in [Appendix C](#). Details can be found in the individual county reports at compassnow.org.

Ideas for Solutions Submitted by Community Stakeholders

As part of the follow-up survey participants were invited to share ideas for solutions to the top community needs identified at the stakeholder meeting. Sixty-five participants responded with 140 ideas as listed in the county-level tables provided in [Appendix C](#). The results reflect the connections between access to health care, socio-economic challenges, and community development. Also, each of the ideas listed would require creative collaboration across organizations and sectors.

Appendix C - County-Level Priority Needs and Ideas for Solutions

Community stakeholder meeting participants were invited to complete a post-meeting survey to prioritize areas of need identified at the meeting, and solutions to meet the needs. This appendix provides county-level tables for the following:

1. Priority Needs Identified by Community Stakeholders
2. Ideas for Solutions Submitted by Community Stakeholders

Buffalo County

Exhibit C.1 Priority Needs Identified by Buffalo County Community Stakeholders

- | | |
|--|-----------------------------|
| 1. Substance Use | 5. Healthcare Access |
| 2. Mental Health – treatment and resources | 6. Alcohol impaired driving |
| 3. Emergency Response - Volunteer Fire and EMS | 7. Transportation |
| 4. Poverty and Hunger | 8. Safe, Affordable Housing |

Source: The seven participants in the community stakeholder meeting were invited to prioritize the areas of need identified during the meeting via a post-meeting survey. Four participants responded. Items are ranked 1-8 based on the mean priority score for each area of need.

Exhibit C.2 Ideas for Solutions Submitted by Buffalo County Community Stakeholders

What are your ideas for solutions to the top community needs identified at the stakeholder meeting?

- I think awareness of these issues are important. We need to make the community aware of the needs as it takes a village!
- It was suggested to re-open the clinic in Alma.
- More education and services around illegal drug use and STDs.
- Need to energize the economy of the county. Fully employed people tend to have the means to address some of the issues on the list.
- We also need to find a way to increase socialization outside of the taverns.

Note: The seven participants in the community stakeholder meeting were invited to respond to this item in their own words. There were three responses with five ideas as listed above.

.....

Houston County

Exhibit C.3 Priority Needs Identified by Houston County Community Stakeholders

- | | |
|---|--|
| 1. Mental Health - Access, Stigma, Providers, School Supports | 4. Cost of Healthcare - Physical, Mental, and Dental |
| 2. Safe, Affordable Housing | 5. Substance Use |
| 3. Access to Well-Paying Jobs | 6. Childcare Availability and Affordability |
| | 7. Economic Growth, Development, and Worker Shortage |

Source: The 34 participants in the community stakeholder meeting were invited to prioritize the areas of need identified during the meeting via a post-meeting survey. Fifteen participants responded. Items are ranked 1-7 based on the mean priority score for each area of need.

What are your ideas for solutions to the top community needs identified at the stakeholder meeting?

- Mental health would be improved if our state and local leaders considered the full ramifications of their policy decisions and made decisions based on science and comprehensive health rather than politics.
- Mental health would be improved if we encouraged people to stop treating words as if they're acts of violence.
- Stop focusing on race, gender, sexual orientation, religion, etc. Constantly labeling people is destructive and counterproductive, and I say this as a person who falls into one of those minority groups.
- I think we need to talk about mental health more in our community.
- More prevention in schools and support for people using in our community.
- Events and locations that promote physical activity and belonging.
- Mental health promotional information.
- Education is a key component for any solution. It is a community effort for all fronts.
- Invite the state to a meeting - how to increase support for local mental health providers; create process to promote already existing resources for mental health
- The mental health and substance abuse really go hand in hand. If we establish a county-based mental health hotline or teletherapy service, we might be able to make a dent in both. If a person is cited for substance abuse, the mental health treatment would be part of the ticket, so to speak.
- Identify affordable programs that provide mental health services, and share with the community through schools, churches, and other organizations.
- More programs to help certify and ENCOURAGE childcare providers. Ways to supplement childcare (in addition to what's already there) and the providers to make the job a well-paying job that may draw more quality candidates
- Consider a housing & development component to address rental/housing inspections.
- Mental health is such an issue, but a tough one to address; likely needs a comprehensive plan that encompasses school and community.
- Pursuing grant options from SAMHSA (or State) and partner with other neighboring communities/counties to create a community pilot project of traveling case workers, social workers, behavior technicians for short term support. This navigation program will help link families to County resources, health care/mental health care, substance treatment etc. they would go into schools to help provide support, resources/bridge the gaps. Follow a wraparound model including team meetings. Work with parents on resources for job skills and other like supports. Work with the City to develop more affordable housing (LaCrescent has many community goals including affordable housing - \$350,000 is not affordable!) Developing a healthy community will draw in more families and individuals who might be willing to open licensed child-care options.
- Big Brother/Big Sister or mentor program for youth

Note: The 34 participants in the community stakeholder meeting were invited to respond to this item in their own words. There were twelve responses with sixteen ideas as listed above.

La Crosse County

Exhibit C.5 Priority Needs Identified by La Crosse County Community Stakeholders

- | | |
|--|---|
| 1. Mental health issues, access, and affordability | 6. Ability to pay for health care/uninsured/underinsured |
| 2. Financial Stability - Poverty/ALICE/Living Wages | 7. Care for Vulnerable Populations - Services, COVID Impact, Supports, Perception |
| 3. Safe, Affordable Housing | 8. Physical Inactivity & Obesity |

Source: The 57 participants in the community stakeholder meeting were invited to prioritize the areas of need identified during the meeting via a post-meeting survey. Twenty-three participants responded. Items are ranked 1-8 based on the mean priority score for each area of need.

What are your ideas for solutions to the top community needs identified at the stakeholder meeting?

- Incentive local businesses that pay a living wage and offer health insurance
- Support local non-profits already working in the healthcare space for the uninsured like St. Francis.
- Offer job fairs outside of working hours (evening or weekends) for those who already have jobs but find them inadequate
- Offer higher-end resume services and placement for professionals moving to the area
- Focus on meaningful diversity education programs (pairing folks from different cultures together in mutually beneficial ways to learn from one another for example)
- Focus on growing the population faster than other similar cities in the Driftless region
- Zone for and incentivize the building of affordable tiny home communities, promote and open up more
- apprenticeship type training opportunities especially for career changers (not everyone needs to take developmental math classes at the community college because they want to change careers or get laid off)
- Emergency after hours mental health care clinics that don't involve the patient committing to an overnight stay or visiting a traditional emergency room, something like the New Beginnings transitional housing being setup in the area I moved from (Northwest Arkansas) (<http://uacdc.uark.edu/work/new-beginnings-homeless-community>)
- Something like Albuquerque's There's a Better Way program (<https://youtu.be/3CTKUveuxx0>) for panhandlers or those homeless looking for work
- Support an Increase in minimum wage and paid family medical leave.
- Continue to improve affordable housing stock.
- Rely less on tourism and hospitality industries and look for climate neutral or energy producing industries that will result in high paying jobs.
- Invest in programs that address high costs of living so that wage earners can afford a quality of life - affordable housing, free/insured healthcare, affordable childcare, reduction of utility/energy/water costs. Employers can subsidize housing, childcare, healthcare, and other costs to make these necessities affordable for workers.
- Hospital systems should provide more accessible and affordable mental health and substance abuse treatment services, especially for children and young adults.
- Expand collaboration for the La Crosse Mental Health Coalition and look into funding sources to expand.
- Regional collaboration of healthcare facilities.
- Increase budget to accomplish more representative and diverse survey respondents.
- Look into grant funding for social, economic, and physical infrastructure and capital improvement. Expand collaboration on community gardens.
- Advocate for universal healthcare or affordable healthcare options.
- Try to expand availability of Covid-19 vaccines.
- Create educational and advocacy programs that is easy to understand at all levels.
- Create subgroups for discussions on Community Needs to expand public input.
- Economic development: new jobs and jobs that pay higher wages; aligning education with where the jobs are; reaching kids at earlier ages to consider a variety of career paths and getting them involved.
- To build a partnership with non-profits and government to tackle the highest needs then work through the list.
- Agency coordination to apply for grants - state and federal
- Less dependence on formal mental health resources and increased training of community-based mental health responders - it is unrealistic (and too costly) to place burden of responding to mental health crises solely on the health systems
- Involve the community in finding the solutions and engage philanthropy to fund the solutions.
- Getting creative especially with homelessness, focus on the family unit and education with kids by giving them the tools to succeed
- I would like to see landlords taking an active approach to help their tenants access services. The City of Atlanta had a group of landlords that hired a social worker for their tenants. The landlords agreed to rent to tenants with less than desirable rental backgrounds, if they had an improvement plan with the Social Worker. It was baby steps to get them back on the right path (credit, mental health and/or drug addiction counseling, sometimes assisting them gain employment, etc.).
- Help change WI Law so the City can reimplement the Rental Inspections Program, in hopes that the conditions of the City's rental stock would improve.
- The improvements at Hamilton School will aid in transforming the Hamilton into a Community School. I think it is important to have services that they may offer available at all times of the day to aid in accessing the services.
- Development of a community wide educational strategy to promote mental health self-care and substance use prevention. People are self-medicating to address their mental health needs. We need to promote alternative strategies to address mental health needs.
- Similar to an Alzheimer's Friendly community initiative-build our county to be a behavioral health (mental health and substance abuse) friendly with informal supports, places to go when in need instead of ER. For example, the Coulee

What are your ideas for solutions to the top community needs identified at the stakeholder meeting?

Recovery Center has a coffee house in their new center which offers a place to gather, talk to others, internet and other resources.

- What about prevention efforts? Patient navigators to help those in need of care to navigate the system which is intimidating. For example, my 32 year old daughter earns \$17/hour. She fell and hurt her back. It was suggested that she get an MRI. She has delayed care because she doesn't know the cost, if her insurance covers, how much of a deductible. If she has to take off work, can she afford to do so? But more importantly, she didn't know who to turn to for answers which is delaying treatment and further deteriorating mental health.
- Have we looked at density and of alcohol, tobacco retailers in proximity to each other, to youth, in certain neighborhoods? GIS mapping available for community use to determine if there is an association between poverty and race and behavioral health, safe housing, supports for vulnerable populations, so that we know where to focus supports and evaluate whether those supports are targeted to make the greatest impact.
- A place for tiny homes to get people back on their feet for a year or two, so that they can learn the skills needed to get jobs and access the resources they need (mental health, finances, healthcare, etc.)
- Mental health issues and addiction are so intertwined they should be a combined goal. With all the formal supports for mental health. Mayo/Gundersen/Lax County, the Mental Health Coalition has identified the greatest gap in mental health support are the "informal supports" for families attacking the issues of navigating the system, loneliness and lack of connectedness, education, and non-stigmatized emotional support. In addition, mental health issues seem to be connected to a variety of other big issues as well, the criminal justice system and homelessness to identify a couple.
- Living wage job in our region as a standard, shifting towards increased benefits for employees in our region to include paid parental leave and community support such as expanded access to affordable childcare.
- Keep allowing partner agencies to do their best work by ensuring their financial stability!
- Develop partnerships with local health care providers to increase the availability for mental health and substance use treatment.
- Work with community to develop affordable housing options.
- Having written policies passed at the state and local level. System-change initiatives that actually change the system and not put a band aid on the situation at hand.

Note: The 57 participants in the community stakeholder meeting were invited to respond to this item in their own words. There were 19 responses with 42 ideas as listed above.

Monroe County

Exhibit C.7 Priority Needs Identified by Monroe County Community Stakeholders

- | | |
|---|--|
| 1. Poverty and Livable Wages | 5. Obstacles to receiving healthcare - appointment time, childcare, transportation |
| 2. Mental Health - Access to Treatment, Stigma, Suicide | 6. Physical Inactivity & Obesity |
| 3. Safe, Affordable Housing | 7. Insurance Access & Education on Resources to Help Pay for Care |
| 4. Culture of Drug & Alcohol Use and Related Crime | |

Source: The 40 participants in the community stakeholder meeting were invited to prioritize the areas of need identified during the meeting via a post-meeting survey. Nineteen participants responded. Items are ranked 1-7 based on the mean priority score for each area of need.

What are your ideas for solutions to the top community needs identified at the stakeholder meeting?

- Increasing the number of mental health providers in our area.
- Increase affordable access to transportation to get to mental health providers and jobs.
- County based help with finding jobs for our youth with poor job history, no job history etc.
- Increase safe, low-income housing.
- Using RTIC to help address drug abuse and alcohol use
- Developing youth-driven initiatives to reduce alcohol and drug use (focus on prevention vs. treatment)
- Partner with developers to bring more safe/affordable housing to the county - especially Sparta and Tomah
- Educate employers on the importance of paying livable wages with benefits
- Provide funding to pay for school/training of low wage earners
- Provide transportation/gas vouchers to households to get to/from medical appts and expand hours of availability for appts
- To increase awareness of programs and services that are available to help people who are struggling.
- Increase the public's awareness of these issues and have community meetings to work on strategies to address them.
- Increase funding for food shelf and public housing
- Increase awareness of resources that exist
- Community leaders, legislators, public, and any others related to the "need" participate in a town hall type meeting to brainstorm.
- Though I ranked it as 7, having better bike paths through Sparta and Tomah would not only help with physical activity but might also offer a transportation option for both youth and adults (more of them, bike lanes on the main streets, helping navigate to farther locations, signage).
- Also need to raise minimum wage in Monroe and surrounding counties (since so many work outside of the county) to address the issues around poverty.
- Cap the rental costs in Monroe county.
- Better transportation between clinics in the County and in La Crosse for care provided by the health systems for those not on Medicaid (Medicaid participants do have access to MTM).
- Collaborating with regional counties to support a local detox or inpatient treatment facility.
- Education--a lot of resources available in the community but a lack of understanding "navigating the system." Having mentors in the community that can help people navigate some of the requirements of a lot of the resources in the community.
- Area hotels to house people in need of safe housing.
- Social work support to help with finding work, medical care, and basic needs such as food and clothing
- Community care coordination for families at high risk, create a framework or use an existing model for community partner collaboration (how to work better together)
- Education on mental health, reduction, of stigma, attract providers to the area Give community incentives to builders who build mixed income housing. Educate the citizens on support groups and treatment options for substance use.
- Expanded benefits/eligibility for ALICE population to promote job retention/self-sufficiency.
- Increased minimum wage to ensure employed persons are able to meet their basic needs.
- Increased access to mental health treatment/care.
- Increased public awareness of access options.
- Normalize treatment/experience of MH issues to work towards eliminating past stigmas surrounding these issues.
- Increased local housing options (increased Section 8 vouchers, income-based housing).
- Expanded program/policy to allow a broadened category of recipients for those with in need of emergency assistance.
- Need to have a triage approach to social services. If that is not feasible, we need to have consistent training on available resources.
- We need to make a focus on early intervention. During the breakout sessions, my team identified many issues that could be more easily resolved if more early intervention were taking place.

Note: The 40 participants in the community stakeholder meeting were invited to respond to this item in their own words. There were 15 responses with 34 ideas as listed above.

|---|--|
| 1. Mental Health - Isolation, Stigma, Providers, Access to Care | 5. Representing Minorities |
| 2. Addiction and Lack of Treatment Options | 6. Access to Childcare |
| 3. Preventable Behaviors - inactivity, obesity | 7. Financial Stability - Poverty/ALICE/Weathering Job Loss |
| 4. Safe, Affordable Housing | 8. EMS and Police Patrol Coverage of the Whole County |
| | 9. Food Desert/Food Insecurity/Food Access |

Source: The 28 participants in the community stakeholder meeting were invited to prioritize the areas of need identified during the meeting via a post-meeting survey. Eleven participants responded. Items are ranked 1-9 based on the mean priority score for each area of need.

Exhibit C.10 Ideas for Solutions Submitted by Trempealeau County Community Stakeholders

What are your ideas for solutions to the top community needs identified at the stakeholder meeting?

- Education about preventable behaviors.
- Identification of people with housing and food needs.
- Affordable housing and food programs.
- There has to be some incentives or funding to provide mental health services.
- As far as preventable behaviors, we have a beautiful county that should lend itself to more outdoor activities.
- Family oriented outdoor activities could establish life-long habits.
- Mental Health:
 - Free group sessions at various community centers in Trempealeau County
 - More support groups
 - Free opportunities to connect with others outside of bars/etc.
- Representing minorities:
 - Extend further information to the Spanish-speaking community about opportunities to get involved in community projects
 - Incentivize Spanish-language training for local police and first responder
 - Representing minorities: Spanish-language education on how local governments work in this area
- Childcare:
 - Host free trainings for people interested in starting an in-home childcare business
 - Provide grants/scholarships to help people set up new childcare businesses in Trempealeau County
- Food Desert/Insecurity:
 - Funding for advertising local food pantries/programs, plant edible plants/fruit/veggies as much as possible in public parks/spaces
 - Set up donation procedures for local stores/restaurants to minimize food waste
- Preventable Behaviors:
 - Provide funding for local organizations to develop community-wide fitness programs
 - Encourage town festivals/local events to include healthier food options available
 - Make sure populated areas have walkable sidewalks
 - Create more outdoor areas that encourage movement (like a fitness walk or simple obstacle course)
- Education about preventable behaviors.
- Identification of people with housing and food needs.
- Affordable housing and food programs.
- Coordination of current medical facilities to address mental health.
- Public awareness campaign to reduce the stigma of having a mental illness.
- Start talking about mental health, normalize it so people don't have stigma against them
- Supporting any efforts to develop in-county chemical dependency treatment programs and providing greater access to out-of-county chemical dependency treatment programs, particularly residential, in-patient treatment. It is recognized that such programs are expensive, but the frequent use of EMS, law enforcement, and medical resources to manage problems created by chemical dependency, not to mention the family, social and economic costs of chemical dependency need to be considered as the cost of NOT having such programs.
- More funding for local programs
- Need more community involvement in recruiting and highlighting EMS importance in the community; get people talking!

Exhibit C.10 Ideas for Solutions Submitted by Trempealeau County Community Stakeholders (cont.)

What are your ideas for solutions to the top community needs identified at the stakeholder meeting?

- We need more help and initiatives to break the stigma of mental illness. I am not sure how, if county has resources/grants?
- Education around fitness and activity will help prevent obesity, improve mental health, and may reduce addiction. Increasing the number of fitness activities for a community such as walks, runs and races will help get people moving.

Note: The 28 participants in the community stakeholder meeting were invited to respond to this item in their own words. There were nine responses with 32 ideas as listed above.

.....

Vernon County

Exhibit C.11 Priority Needs Identified by Vernon County Community Stakeholders

- | | |
|--|---------------------------------|
| 1. Mental Health | 7. Health Information Education |
| 2. Poverty / Livable Wages / Socioeconomic Disparities | 8. Overall Access to Care |
| 3. Childcare | 9. Emergency Response |
| 4. Safe & Affordable Housing | 10. Vaccine Hesitancy |
| 5. Mobility & Transportation Access | 11. Safe Drinking Water |
| 6. Overall Ability to Pay for Care | 12. Civil Unrest |

Source: The 25 participants in the community stakeholder meeting were invited to prioritize the areas of need identified during the meeting via a post-meeting survey. Nine participants responded. Items are ranked 1-12 based on the mean priority score for each area of need.

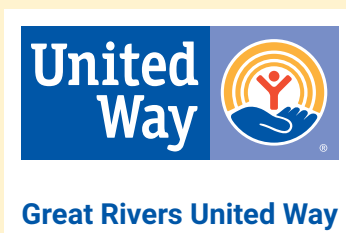

Exhibit C.12 Ideas for Solutions Submitted by Vernon County Community Stakeholders

What are your ideas for solutions to the top community needs identified at the stakeholder meeting?

- Increased access/providers for Behavioral Health.
- Education on reducing the stigma of receiving Behavioral Health services.
- Find ways to bring mental health providers to our community who are willing to accept patients with Badger Care or Medicaid.
- Are villages/towns able to offer some start up assistance for daycare centers or offer grants or support for those running in home daycares to enhance their opportunities?
- Also encourage and support the development of mixed income housing development.
- Advocate for livable wages.
- I feel that at the heart of everything we struggle with is the family unit. There are families that are flourishing and there are families who are struggling. The families who are struggling have a lower socio-economic status, lower paying jobs, struggling with understanding how to manage life, debt, healthcare, childcare, money, etc.
- County, cities, villages to make it easier for business to come to Vernon County. Available jobs will help deal with some of the other issues.
- Attract and retain new business to bring more jobs to the rural regions of the county.
- Strong Local Economic Development Programs and Initiatives.
- Partnerships with local stakeholders.

Note: The 25 participants in the community stakeholder meeting were invited to respond to this item in their own words. There were seven responses with eleven ideas as listed above.
